Medifax NetDirect™

Verify Patient Eligibility @ Net Speed

The Internet is the fastest growing medium for processing healthcare transactions. *Medifax EDI* gives you the capability of quickly verifying patient eligibility via the Internet with **Medifax NetDirect,** a browser-based secure transaction-processing site. We have combined the speed and convenience of the Internet with our network of Medicaid, Medicare, and commercial databases available 24 hours a day/7 days a week.

Medifax NetDirect is a secure transaction-processing site that meets CMS/HCFA criteria for Identification, Authentication, and Encryption. With an Internet browser (such as Netscape or Microsoft's Internet Explorer) and a unique identification code, the user selects the appropriate payer database, fills in the appropriate patient information, and receives an instant response that can be printed and filed.

Medifax NetDirect has the ability to verify patient eligibility for a single individual inquiry, during registration, or for a group of records called "batches".

Medifax NetDirect is the perfect eligibility verification solution for healthcare providers that prefer to use the Internet. The batch feature makes this product especially attractive for physician practices, medical groups, business offices, billing services, admitting, and more.

Other Features & Benefits

- Easy to use
- Much faster than verifying eligibility over the phone
- Ability to print the eligibility response
- Batch processing
- Supports dozens of health plans for eligibility verification including your state Medicaid, surrounding state Medicaid, Medicare, and commercial plans
- "Cascade" search technology - the cascading search automatically processes all available search criteria to determine patient eligibility
- Ability to submit a batch and "minimize" NetDirect to work in other applications
- Eliminates human error
- Improves patient information
- On-line user guide
- Windows and Internet functionality
